PROJECTS:

[\[Link\]](#) | [\[GitHub\]](#) | **Hostel Management Web Application (Team Project)**

Role: Backend Developer

Tech Stack: Node.js, Express.js, MongoDB

- Developed server side and integrated with client side, which contains student and warden login.
- Existing students can login, and are allowed to select hostel, floor, room and room type. And also added a feature to request for outing / leave.
- Wardens can login with various features such as allocating a hostel with respect to the student's year of study.
- Can search students by ID and Room Number. And also can accept and reject outing requests.

EDUCATION:

Gitam University (vizag) - Pursuing B.tech in Computer Science Engineering
