[\[Link\]](#) | [\[GitHub\]](#) | **Nike Clone** ( Full Stack Project )

**Tech Stack:** MERN

- Developed an E-commerce website where browsing, cart management, and checkout flow are possible.
- Implemented a User-friendly UI for an authentic experience.

[\[Link\]](#) | [\[GitHub\]](#) | **Hostel Management Web Application** ( Team Project )

**Role:** Backend Developer

**Tech Stack:** Node.js, Express.js, MongoDB

- Developed server side and integrated with client side, which contains student and warden login.
- Students can log in if not allowed to register the student and are permitted to select hostel, floor, room, and room type. And also added a feature to request for outings/leave.
- Used password hashing for authentication and security purposes.
- Wardens can log in with various features, such as allocating a hostel according to the student's year of study.
- Can search students by ID and Room Number. And also accepts and rejects outing requests.

## EDUCATION:

**Gitam University (Vizag)** - Pursuing B.tech in Computer Science Engineering
